B2C Service Agent Browser User Interface May 02, 2024 Release

	Description
	Data Import
	An issue that prevented the deployment of Custom Object in target during import has been resolved.
	An issue that prevented the association of CO generated reports to workspaces or agent scripts associated with the CO in the target site during import has been resolved.
	Workspaces/Workflow
	An issue that caused the status field to not set correctly by workspace rules right after login has been resolved.
	An issue that caused an exception error with a Customer Entry from the Extensibility API when there is no Customer Entry present has been resolved.
