

## B2C Service Agent Browser User Interface April 7, 2022 Release

 Description
 Analytics
An issue that prevented dashboards that combined filters with the same name and type from working correctly has been resolved.
An issue that caused reports that were configured with cross-tab columns to display incorrect column references has been resolved.
 Data Import
An issue that prevented the importation of custom objects using Element Manager when the same name was used for the object and a field within the custom object has been resolved.
An issue that caused the deletion of existing reports in the target site when, using Element Manager, the importation of navigation set elements was cancelled has been resolved.
